Portfolio: portfolio-inky-sigma-52.vercel.app

Professional Summary

Computer Science student with full-stack development experience and 20+ personal projects. Proven ability to deliver production-quality applications using modern web technologies. Seeking a digital services internship to leverage technical skills and collaborative experience.

Technical Skills

Frontend: React, TypeScript, Next.js, HTML5, CSS3, JavaScript

Backend: Node.js, Express.js, RESTful APIs

Database: PostgreSQL

Tools: Git, Vercel, Render

Professional Experience

Software Development Intern | Event Booking Platform | 3 months

- Contributed to live production application development using React, TypeScript, and Next.js
 - Collaborated with senior developers on feature implementation and code optimization
 - Gained experience with real-world deployment and user-facing applications
-

Education

Bachelor of Science in Computer Science

Federal University of Oye Ekiti | Expected 2026 (4th year)

Relevant Coursework: Data Structures, Algorithms, Software Engineering, Database Design

Key Projects

Online Voting System

Secure platform with user authentication and real-time results using modern web stack

Personal Finance Tracker

Full-featured application with data visualization and budget management features

Event Booking Platform (Professional)

Production-level system serving real users with React, TypeScript, Node.js, and PostgreSQL

Core Competencies

- **Full-Stack Development:** 20+ projects using React, TypeScript, Node.js, and PostgreSQL
- **Problem Solving:** Built complex systems including voting platforms and financial trackers
- **Team Collaboration:** Mentored by senior developers in professional environment
- **Rapid Learning:** Quick adaptation to new codebases and development workflows
