PROFESSIONAL SUMMARY

Frontend developer with 5+ years of hands-on experience building responsive web applications using React and JavaScript. Currently working as a Frontend Developer at Tripplex Technologies on the LoftSpace platform while continuing at DigitalFigures on an education product. Graduated with a BSc in Computer Science (CGPA: 3.79/5.0) from Federal University of Oye-Ekiti in July 2026. Experienced in delivering freelance projects for international clients and passionate about writing clean, performant code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3
Frameworks & Libraries: React, Tailwind CSS, Bootstrap CSS, styled-components **Tools & Platforms:** Git, GitHub, VS Code, Figma, REST APIs, Vercel

EXPERIENCE

Frontend Developer **Mar 2026 – Present**
Tripplex Technologies

- Building the frontend of LoftSpace, including the business dashboard used by hosts and the guest-facing app.
- Implementing responsive, reusable UI components and integrating them with backend REST APIs.
- Collaborating with the team on UI implementation, component architecture, and performance.

Frontend Developer Intern **Jan 2025 – Present**
DigitalFigures — Ibadan, Nigeria

- Contributing to frontend development of an education web application and other client-facing products using React and modern JavaScript.
- Collaborating with the product team on UI implementation, component architecture, and performance optimisation.
- Gaining hands-on experience in a professional agile development environment.

Freelance Frontend Developer **2025**
Self-employed — Remote

- Designed and delivered multiple client websites and web applications, managing projects end-to-end from requirements to deployment.
- Built a cross-platform mobile hiking tracker app (MHike) for an international client using .NET MAUI and SQLite.
- Developed a full-stack Tesla Tweet Sentiment Analyzer combining VADER and Logistic Regression ML models with a React frontend.
- Maintained direct client communication, consistently delivering projects on time and within scope.

PROJECTS

Tesla Tweet Sentiment Analyzer
React, FastAPI, Python, NLTK, scikit-learn, pandas | Freelance Client Project

- Built a hybrid ML sentiment analysis app combining VADER lexicon analysis and Logistic Regression with TF-IDF.
- Delivered an interactive React dashboard with file upload, visual analytics, and Excel report export.
- Exposed analysis via a RESTful FastAPI backend with health check and batch processing endpoints. **MHike — Cross-Platform Hiking Tracker**

.NET MAUI, C#, SQLite | Freelance Client Project

- Developed a cross-platform mobile app for an international client to log hikes, track statistics, and manage observations.
- Implemented full CRUD operations via a SQLite database service with structured data models.

EDUCATION

BSc Computer Science **2022 – July 2026**

Federal University of Oye-Ekiti (FUOYE) CGPA: 3.79 / 5.0

- Relevant coursework: Data Structures & Algorithms, Software Engineering, Web Development, Database Systems.
